

BUILDING 21ST CENTURY SCHOOLS FOR 21ST CENTURY LEADERS

"Working together, we are living up to our most important obligation by providing 21st Century Schools to ensure that every child has the opportunity to get the education they deserve and the skills necessary to succeed."

- Governor James E. McGreevey

The New Millville Early Childhood Center

The new Millville Early Childhood Center consists of a complete renovation and addition to the former Prudential Insurance office building. The main building will house approximately 38 classrooms, administrative spaces, specialized instructional spaces such as a gross motor skills development area, a kitchen, child study offices and a social workers office. When the project is complete it will offer Millville a state-of-the-art early childhood facility. The project totals about 61,000 square-feet of space and will cost approximately \$14 million.

Lakeside Middle School Addition & Renovations

New Jersey Schools Construction Corporation (SCC) and Millville School District officials marked the start of construction of a \$13.7 million addition for a new gymnasium and auditorium at Lakeside Middle School at a groundbreaking ceremony last December. The project will include a main gym with lockers and bleachers, an auxiliary gym, choral and instrumental music rooms and an auditorium. It is being fully funded and managed by the SCC as part of the State's unprecedented \$8.6 billion school construction program.

LAKESIDE MIDDLE SCHOOL

Millville Senior High School Additions & Renovations

This project consists of an expansion and renovation to the existing school. When completed the additions and renovations will bring the Millville Senior High School into conformance with state mandated requirements for educational adequacy. The

MILLVILLE SENIOR HIGH SCHOOL

spaces included in the new and renovated areas consist of: 13 general classrooms, an auxiliary gymnasium, 6 new science labs, a state-of-the-art media center, 10 small group classrooms and a cafeteria/kitchen expansion. A new telephone, clock and communications system is a part of the project as well as a complete technology upgrade. The existing temporary structure will be removed to allow for re-use of the parking areas it occupies. The existing school contains approximately 170,000 square feet. The new additions will add about 61,000 square feet and 20,000 square feet in the existing building will be renovated. Design drawings for this project are nearing completion and are in the first stages of review by The Department of Community Affairs. Bids for construction are expected to be submitted in summer 2004 with construction beginning in early fall of this year. Completion is expected in the spring of 2006. The cost of this project is approximately \$16 million.
